# Now you can make the bond market work for you

---

Welcome to BondNav®, the fixed income technology platform created to simplify your experience and accelerate your success in the bond market. It puts you in the center of the fixed income universe and gives you control over your trading experience.

---

BondNav gives you the freedom to focus on what matters most – enhancing your client relationships and growing your business.

We can't control the market, but we can control your experience.  
BondNav seamlessly delivers:

Greater access to the fixed income markets

Comprehensive pre-trade intelligence

The ability to seek price improvement on every trade

Compliance with post-trade documentation

### Connect to the entire market

BondNav gives you instant access to fixed income markets through cloud-based technology that connects wealth management, middle market, and institutional customers with virtually all of the electronic bond trading networks. **BondNav's cutting edge technology not only simplifies your access to the bond market – it's fast and easy to use.** With BondNav there are no complex agreements or costly hardware or programming requirements.

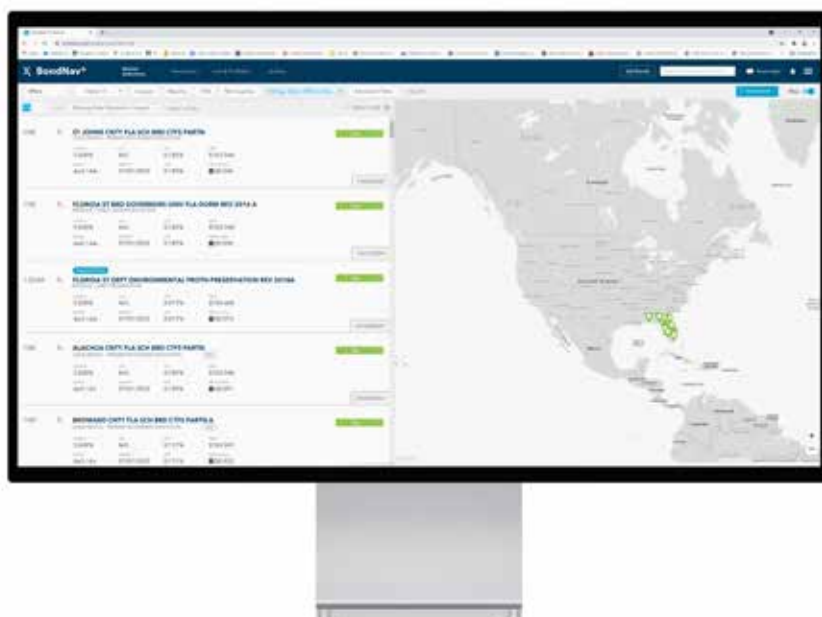

### Take control

BondNav makes it easy for you to customize your fixed income market experience to align with your client portfolios and your workflow – so **you see the bonds you want, when you want them.** By reducing market complexity and clutter with BondNav filters, you accelerate your efficiency and productivity, so you can spend less time trading and more time helping your clients and growing your business.

Determining best execution for a particular order should include factors such as the prevailing conditions within the market(s) in question and a range of other quantitative and qualitative execution factors which may include, but are not limited to: price, inventory, liquidity, likelihood of execution and settlement, transaction size, proven expertise, discretion, speed of execution or other considerations. Given the diversity of market structures and financial instruments, it would be impractical to uniformly apply a single standard of best execution. Thus, different factors might have to be taken into account when assessing best execution in the context of different instruments and markets.
